Technical Pre-Sales | Data & AI Builder | Client Advocate

EDUCATION

Northwestern University, *Evanston, IL*
Bachelor of Science, *Computer Engineering*

SKILLS

Solution Engineering / Pre-Sales: Discovery, Technical Demos, POCs, Solution Scoping, Value Selling, B2B Sales, CRM (Salesforce), Stakeholder Management, Onboarding & Training
AI & Data: AI/Agent Workflows (MCP, RAG, Prompt Engineering), Python, SQL, dbt, Snowflake, ETL/ELT, AWS (S3, Lambda, Glue, Kinesis), Airflow, PySpark, Streamlit, Power BI, Docker
Software / Full-Stack: JavaScript/TypeScript, React.js, Node.js, C#/.NET, HTML5/CSS3, Java, Git/CI-CD

CERTIFICATIONS

- **Salesforce:** Marketing Cloud Administrator
- **Anthropic:** Claude Code in Action; Building with Claude Code
- **dbt Labs:** dbt Fundamentals
- **Kaggle / Google:** 5-Day Agents Intensive
- *In progress:* AWS Data Engineer Associate; Databricks Gen AI Engineer Associate

EXPERIENCE

Genpact, LLC Atlanta, GA
Lead Presales Consultant/Associate Manager Feb 2026 – Present

- Presales lead on AI and data-platform pursuits — partner with functional business owners and Gas Power Data Science & AI leadership to scope incoming projects, translating ambiguous business problems into technical solutions that win and expand accounts.
- Own a **$1M book of business** targeted for aggressive growth, positioning AI accelerators to shorten time-to-value.
- Scoped a **GenAI solution for field-service report guidelines** projected to save **hundreds of hours annually**; built the business case for an **agentic field-services assistant for GE Steam** with **projected savings of up to $43M over its first five years**.
- Architect solutions that minimize tech debt and hold up post-sale — bridging the pre-sales promise to delivered reality.

Career Break/Pivot Brooklyn, NY
Independent January 2024 – January 2026

- Deepened hands-on data engineering (AWS, SQL, Python) and AI/agent frameworks through structured self-study, mentorship, and the shipped projects below.
- Built + deployed several end-to-end data and AI applications (see Projects) while evaluating a targeted return to a technical, customer-facing role.
- Traveled to 11 different states and 5 different countries, reconnecting with friends, and supporting family

Magna Technology Group (MTG) 2023 Inc. 5000 Fastest Growing Companies #801 Brooklyn, NY
Sales Director April 2023 – December 2023

- **Co-sold directly with Salesforce Account Executives** as their implementation partner — scoped the services/implementation half of deals so AEs could close on combined ACV + upfront services. Ran the discovery → scope → proposal motion alongside Salesforce's own reps.
- Supported a territory of **500+ Salesforce AEs** across verticals (NA), carrying a **$1M year-1 quota** and hitting monthly milestones tracked in Salesforce.
- Built client-ready demo content on **Marketing Cloud Personalization & Data Cloud** that **4x'd cold response rate**; used CRM data to target reps by vertical, company size, and product.
- Turned custom SOWs and scoped solution packages in **as little as 24 hours — 3x'd open pipeline** for a net-new B2B service line.
- Built POCs and implementation roadmaps with CXO and cross-functional stakeholders.

Accenture, LLP Washington, DC
Application Development Senior Analyst August 2020 – April 2023

- Designed and ran the E2E User Acceptance Testing strategy for a global industrial-machinery manufacturer across 3 quarterly deployments and 3 facilities — **>90% cumulative bug reduction** (>30% per deployment).
- Owned front-end design of a public-facing product-search site for a **$4B materials company** (React + AntDesign), collaborating with data-science and backend teams.

- Developed full-stack security POCs demoing **HL7 + FHIR** integration on OpenID/Auth0/Okta; built a Camunda BPMN microservice system (Java/Spring) for high-volume patient interaction.
- Rebuilt 300+ project documents into structured guides — **cut new-member time-to-value 50%**; ran client enrichment committees and covered on-site management for 30+ users.

Microsoft (Azure Networking) Redmond, WA

Software Engineering Intern June 2019 – September 2019

- Built a cross-platform (Linux/Windows) multithreaded REST endpoint in .NET Core with a Swagger front-end to test networking functionality across cloud resource groups.
- Wrote the team's first Linux shell scripts to automate VM deployment; partnered with the Azure Security team to ship the first internal fully-automated dynamic security-key deployment.

PROJECTS

Sales Enablement Assistant (Jun 2026) — Built an AI tool that pulls company + deal context to generate sales motions and a pitch deck (open-source Presenton). Full-stack: React, Flask, LangChain RAG with Gemini, hosted on Render.

Healthcare Data Pipeline + Analytics (Apr 2025) — Ingested 15 nursing datasets via Google Drive API → AWS Lambda → Glue → Snowflake; built Streamlit dashboards on readmission, staffing, and patient-to-provider ratios.

Store Data Analysis (Mar 2025) — End-to-end incremental ingestion from S3 with dbt + Snowflake; Python visualizations correlating sales against unemployment, fuel price, CPI, and temperature.

LEADERSHIP/INTERESTS

Volunteer, Brooklyn Animal Action (2024–present) & Animal Welfare League of Arlington (2020–2023) — foster care, adoptions, fundraising.

Club Rugby · Leadership Coaching · Snowboarding · Foster Child Mentorship (Atlanta Angels).
